

# H1N1 VACCINE INFORMATION

## H1N1 Vaccine Local Providers

The Corpus Christi-Nueces County Public Health District has compiled a list of local medical providers who have requested to be listed as a resource of the H1N1 vaccine.

We advise you to contact your family doctor's office or health care provider in advance to confirm the vaccine is available before making an appointment.

The health care providers listed have all agreed to provide H1N1 vaccines as it becomes available and to be included in this listing.

Health care providers receive their vaccine supply directly from the CDC's distributor, McKesson. Small amounts of the H1N1 vaccine are being allocated by the CDC at this time. Additional supply is anticipated over the next weeks and months.

Some additional providers and doctor's offices who have agreed to provide vaccine have chosen not to be listed at this time.
