Residential Plumbing Projects

Congratulations!

You have taken a big step towards making improvements to your home. A well planned plumbing project such as an upgrade of your water heater will not only provide more energy efficient service, it will also save energy and money.

Before you get started, there are some important items to consider such as:

- What Approvals or Permits are Required?
- Will I need to hire a professional or can I do the work myself?
- Will the scope of my project require other approvals?

While it may seem confusing, we're here to help make your project a success.

We're here to take the guess work out of your project!

What is Required?

A general plan is required detailing the scope of work you will be performing. As you get closer to your project, more detailed plans may be required for our review.

Depending on the size of your project, detailed plumbing drawings may be required. Our project managers will discuss this in detail with you.

In general, a plumbing permit is required. If your project impacts the mechanical or electrical systems, other permits may be required in those areas. Our project managers will discuss this in detail with you.

Plumbing permits can only be issued to a valid plumbing contractor or to a homeowner who provides proof that they are homesteading the property.

What to Expect

If you are seeking general information, one of our early assistance staff will discuss your project needs. You can then call us when you are ready to proceed with your project.

If you are ready to go, one of our project managers will assist in getting the necessary approvals to get your project off and running. This may entail dropping off a set of plans for our review and depending on the complexity, a 24-48 hour turnaround time. Simple projects may be permitted over the counter on the same day. You may schedule an appointment or simply walk in to our office and ask to speak to an Over the Counter Project Manager.

How Much Does It Cost?

Permits costs start at \$76.88. Prices will vary depending on the project type, scope, complexity, etc. A project manager can provide you with an estimated fees list to help you plan your project.
