Flood Zone Questions

Congratulations!

You have taken a big step in seeking information regarding the protection of your property in a potential flood hazard zone. As you are aware, Corpus Christi is in a relatively flat area.

Before you get started on your project, there are some important items to consider such as:

- What local or federal approvals are required?
- Will I be able to get insurance on my property if I build in the flood zone?
- What happens if I am flooded? What resources are available to me?

We're here to take the guess work out of your project!

While it may seem confusing, we're here to help make your project a success.

What is Required?

A general site plan is required detailing the scope of work you will be performing. As you get closer to your project, more detailed plans may be required for our review.

If there are any drainage concerns, you may need to hire a professional engineer who can help you deal with the water run-off concerns.

More detailed information may be required as you discuss your project further. A project manager or early assistance team member can help get you through any concerns you may have. We may also be able to provide a map showing your elevations as available through the FEMA website. Ask a staffer for assistance.

Additional Information

We offer detailed Federal Emergency Management Administration (FEMA) brochures that discuss flood insurance, flood zones, and a wide variety of other topics. Please help yourself to any brochure or ask one of our staff to provide a take home brochure specific to your needs.
