# The SYSTEM in Ecosystem

## Ashley Bennis, Hazards Planning Specialist

Ms. Bennis will present about local stormwater runoff and water quality issues that affect all of us in the Coastal Bend Region. She will be using a floodplain model to demonstrate how different surface types in our environment affect the flow and quality of water after different size rain events. Flooding is a major cause of property and road damage. Understanding how management practices can accommodate and clean the influx of stormwater is crucial to community resilience.

- Class size limited to 24 participants.
- This program is FREE of charge and open to individuals and families.
- Walk-ins are welcome on a first come first served basis.
- This program is for individuals and families with children ages 12 and older.
- To reserve a space, please register at <http://register.ccparkandrec.com>.
