The SYSTEM in Ecosystem

Morgen Ayers, Natural Resources Specialist

Ms. Ayers will present about the importance of seeing your community's ecosystems as hard working interrelated parts. The roots hold the soil in place, which holds the water in place for the plants that filter the water before it enters the bays.

If one component is removed the balance is disturbed, plant and animal species may change, water properties may shift, and your backyard may look much different.

- Class size limited to 24 participants.
- This program is FREE of charge and open to individuals and families.
- Walk-ins are welcome on a first come first served basis.
- This program is for individuals and families with children ages 12 and older.
- To reserve a space, please register at <http://register.ccparkandrec.com>.
