Street Closures and Traffic Impacts

May 10, 2024

CORPUS CHRISTI, TX – Street closures along major City streets impacting motorists and pedestrians are listed below. These closures may be due to construction, special event activity, or maintenance. All closures are subject to change due to weather, emergency work, or other circumstances.

Work zone safety is a priority. Motorists are advised to slow down, follow posted speed limits, pay attention, watch out for workers, obey signs and flaggers, and allow additional travel time for delays.

CITY STREET RECONSTRUCTION OR MAINTENANCE PROJECTS

Airport Road – Morgan Avenue to Horne Road

In Phase 2 of the project, the entrance of Airport Road from Horne Road will be closed entirely. Motorists can access this road through Morgan Avenue. Motorists will also have access to Salinas Park from Airport Road.

Alameda Street – Del Mar Boulevard to Louisiana Avenue

The southbound lanes on South Alameda Street stretching from Southern Street to Chamberlain Street will be closed. Construction will limit traffic to two-way, single-lane traffic on the northbound lanes.

Carroll Lane – Holly Road to Dead End

The contractor for Carroll Lane is now in Phase 2 of the project. During this phase, Carroll Lane will be completely closed off from Crestdale Drive to Pangani Drive on the northwest lane and completely closed off from Crestbrook Court to the dead-end past Beauregard Drive on the southwest lane.

Everhart Road – Staples Street to South Alameda Street

The Everhart Road project will advance to Phase 1B. During this phase, the closure of the southbound lane will be extended beyond Whataburger Way and conclude just before Burney Drive. All left turns at Staples Street and Everhart Road intersections will continue to be prohibited.

Gollihar Road – Greenwood Drive to Crosstown Expressway

Phase 2 of the Gollihar Road project has begun. Gollihar Road will be fully closed from Greenwood Drive to Bernadino Street and partially closed on the eastbound lane from Bernadino Street to Crosstown Expressway. Motorists will still have single-lane, two-way traffic.

Hearn Road – Callicoatte Road- to the Dead End

In phase 3 of the project, Hearn Road is closed from Lott Avenue to Duntstain Street. Starting Monday, April 15, the Duntstain Street and Hearn Road intersection will be closed for approximately one month.

Jackfish Avenue – Park Road 22 to Aquarius Street

Jackfish Avenue is closed for construction on the north lane from Park Road 22 South Access to Aquarius Street. The construction will reduce traffic to single-lane, one-way traffic going northwest-bound.

Lipes Boulevard – Sun Wood Drive to Staples Street

The Lipes Boulevard project has begun Phase 1. The roadway between Sun Wood Drive and Clubgate Drive is closed to thru traffic for construction.

McArdle Road – Kostoryz Road to Carroll Lane

The westbound side of McArdle Road between Kostoryz Road and Carroll Lane will be closed to all westbound traffic. Motorists will only be able to travel eastbound on this stretch of road.

Schatzell Street – North Mesquite Street to Middle Broadway Street

The Street Preventative Maintenance Program (SPMP) is working on Schatzell Street between North Mesquite Street and Middle Broadway. The work consists of milling and asphalt placement operations. For the duration of the work, no on-street parking will be available.

Middle Broadway Street –Schatzell Street to Lawrence Street

The Street Preventative Maintenance Program (SPMP) is working on Middle Broadway Street between Schatzel Street and Lawrence Street. Work consists of milling and asphalt placement operations. No on-street parking will be available for the duration of the work.

Lawrence Street – Middle Broadway Street to North Mesquite Street

The Street Preventative Maintenance Program (SPMP) is working on Lawrence Street from Middle Broadway Street to North Mesquite Street. Work consists of milling and asphalt placement operations. No on-street parking will be available for the duration of the work.

Lawrence Street – North Chaparral Street to North Shoreline Boulevard

The Street Preventative Maintenance Program (SPMP) is working on Lawrence Street from North Chaparral Street to N Shoreline Boulevard. Work consists of milling and asphalt placement operations. No on-street parking will be available for the duration of the work.

Wildcat Drive – Northwest Boulevard to Teague Lane (Bond 2020)

In Phase 3 of the Wildcat Drive project, Wildcat Drive will be cut off at the driveway of the Calallen ISD Administration Building, Teague Lane will be cut off at Catfish Drive, and River Canyon will be closed at the last driveway.

Oso Parkway – Bar-Le-Doc Drive

City Storm Water Maintenance Crews will replace drainage infrastructure underneath Oso Parkway's drainage crossing. City crews will set up a temporary full street closure of Oso Parkway to perform maintenance repairs. Message boards and construction signage will guide motorists around the closure. Residential access will not be affected by the temporary street closure.

CITY PERMITTED CLOSURES

Alameda Street – at Texan Trail Intersection

A contractor for AT&T is installing new communication facilities under Alameda Street at the Texan Trail Intersection. Contractors will implement sidewalk closures to create a work zone for construction operations. Signs will be in place to guide pedestrians to use other crossing routes. Work at this location is expected to last one week.

Blanco Road – McNorton Road to Dead End

A private development contractor is installing a new stormwater line under Blanco Road from the outfall to past McNorton Road. The proposed construction will be completed in two phases. During phase 1, the contractor will construct a stormwater line from the existing outfall to just short of McNorton Road. The contractor is implementing a temporary, full-street closure of Blanco Road to perform construction activities. Residents will have access points to enter the work zone to their respective homes.

As construction progresses to phase 2, the contractor will construct a stormwater line through the intersection of Blanco Road and McNorton Road. The contractor will implement a temporary full-intersection closure during this phase to perform construction activities. Detours will be in place to guide motorists around the work zone. Motorists will always have residential access during construction. Construction is expected to last several months.

Blanche Moore Drive – South Padre Island Drive to Willams Drive

A contractor for Spectrum is installing new communication infrastructure along Blanch Moore. Contractors are also implementing temporary sidewalk closures along Blanche Moore Drive's southbound direction. Motorists will always have access to businesses during construction, which is estimated to last one month.

Carancahua Street – Buffalo Street to Blucher Street

A contractor for AEP Texas is performing electrical upgrades and maintenance to the power supply in the Uptown District. The contractor will be implementing various sidewalks and lane closures along Carancahua Street. Motorists will always have access to businesses during construction. Construction is estimated to last one month.

Chaparral Street – IH 37 to Mann Street

A contractor for AT&T is installing new communication infrastructure along Chaparral Street. Contractors are implementing temporary sidewalk and lane closures along the northbound direction of Chaparral Street. A sidewalk detour will be in place to guide pedestrians around the

work zone. Motorists will always have access to businesses during construction. Construction is estimated to last one month.

Caldwell Street – Mexico Street to Brownlee Boulevard (Guerra Underground)

The subcontractor for Flat Iron Dragados is installing a new wastewater line between Mexico Street and Brownlee Boulevard as part of the New Harbor Bridge Utility Relocation Project. Construction is progressing and is now in its final phase. A temporary street closure of Caldwell Street between Mexico Street and Brownlee Boulevard will be in place for the final phase. A temporary intersection closure of Caldwell Street and Mexico Street will be in place as construction progresses to the west. Detour signs will be in place to direct traffic around the temporary street closure. Residents will always have access during construction.

Embassy Drive – South Padre Island Drive to Corona Drive

A contractor for a restaurant chain is connecting a fire line to an existing water line along Embassy Drive. To excavate the sidewalk and make the connection, the contractor is implementing a temporary sidewalk closure along the southbound travel lane. A detour will guide pedestrians around the work zone. Construction is expected to last several weeks.

Flynn Parkway – South Padre Island Drive to Corona Drive

A contractor for Grande Communication is constructing new facilities within the right of way. The contractor is implementing a temporary sidewalk closure along the northbound travel lane to excavate the sidewalk. A sidewalk detour will be in place to guide pedestrians around the work zone. Construction is expected to last several A sidewalk detour will be in place to guide pedestrians around the work zone. Construction is expected to last several weeks.

Hampshire Road – Benys Road to Lantana Street

A Corpus Christi Independent School District contractor is constructing a header curb, sidewalk, and driveway along Hampshire Road. The contractor will conduct flagger operations to guide motorists around the work area. Warning signs will be in place to advise motorists of the traffic pattern ahead. Construction is expected to last several weeks.

Leeward Drive – St. Bartholomew Avenue to Robla Drive

A contractor for AEP Texas is replacing power lines and poles along Leeward Drive. The contractor will implement daily sidewalk and lane closures to provide a work area for

construction. Motorists will always have residential access. Construction is expected to last several months.

Leopard Street – Callicoate Road to Western Drive

A contractor for a private development is working on utility service connections. The contractor is not implementing lane closures but will have traffic control to advise motorists of the work zone ahead.

Leopard Street – Corn Products Road to Southern Minerals Road

A contractor for a private business is working along the north right of way of Leopard Street to connect a new 6-inch waterline to an existing water main. Contractors will not be implementing lane closures for construction. However, warning signs will be in place to advise of utility work ahead. Construction is expected to last several weeks.

Lomax Street – North Mesquite Street to North Chaparral Street

A contractor will have two 20-cubic yard dumpsters on site. TAMUCC is renovating its first floor at Lomax & Chapparral and requires the equipment to remove trash and debris accordingly. Dumpsters will be on site for approximately 30 days.

Mesquite Street – Starr Street to Peoples Street

A contractor for Spectrum is installing new underground facilities along Mesquite Street and Peoples Street and will implement sidewalk and parking lane closures to perform construction. Work at this location is expected to last one month. Motorists will always have access to businesses.

Morgan Avenue – Shawnee Street to Virginia Avenue

The outside westbound lane of Morgan Avenue stretching from Shawnee Street to Virginia Avenue will be closed. Westbound traffic will be reduced to a single lane beginning Monday, May 13 at 11:00 p.m. through Tuesday, May 14 at 3:00 a.m.

Ocean Drive – Ennis Joslin Road to Island Boulevard

A contractor will be performing survey operations on the Oso Creek Bridge. Daily temporary lane closures will be implemented as operations progress. Motorists should use caution and expect brief delays when driving through the work zone. The surveying operation is expected to last several weeks.

Port Avenue – Horne Road to Baldwin Boulevard (Clark Pipeline)

The contractor is replacing a 16-inch water main along South Port Avenue from Horne Road to Baldwin Boulevard. Construction has progressed into the next phase. However, Southbound Port Avenue will remain reduced to one lane between Baldwin Boulevard and Tarlton Street, utilizing the center turn lane as the travel lane. Northbound Port Avenue travel lanes will not be affected. In addition, other lane closures along the project limits may occur for lateral waterline installations. Construction at this location is estimated to last several months.

Port Avenue – at Ayers Street Intersection

A demolition contractor for the Regional Transportation Authority is removing the existing bus station and other facilities. To perform demolition operations safely, the contractor is implementing a temporary shoulder and sidewalk closure. Warning signs will advise motorists and pedestrians of the construction ahead. Construction at this location is expected to last several months.

Port Avenue – Agnes Street to Lipan Street

A contractor for Corpus Christi Water Department (CCW) is making utility improvements along Port Avenue. To perform demolition operations safely, the contractor is implementing a temporary shoulder and sidewalk closure. Warning signs will advise motorists and pedestrians of the construction ahead. Construction at this location is expected to last several months.

Prescott Street – South Padre Island Drive to Trojan Drive

A City of Corpus Christi contractor will temporarily close Prescott Street from South Padre Island Drive to Trojan Drive beginning May 13. Construction to resurface the road, a scheduled project on the Rapid Pavement Program, is expected to last two weeks, weather permitting.

Rodd Field Road – Yorktown Boulevard to Mansions Drive

Foremost Communications is installing new aerial fiber optic facilities along Rodd Field Road. The contractor is implementing daily temporary lane closures on the northbound travel lanes. Side streets intersecting with the work zone may be temporarily closed for a short period while crews run a fiber optic line across. Motorists will always have access to businesses during construction. Construction is estimated to last one month.

Shoreline Boulevard – Peoples Street to Taylor Street

A contractor for Spectrum is installing new communication infrastructure along Peoples Street and Shoreline Boulevard. Contractors are implementing temporary sidewalk and parking lane closures along Peoples Street's westbound travel lanes and occupying the grass medians along Shoreline Boulevard. Motorists will always have access to businesses during construction. Construction is estimated to last one month.

Surfside Boulevard – Access to Surfside Park

A contractor for the City is demolishing and reconstructing Surfside Park's facilities. The contractor is implementing a temporary full street closure to both access roads, restricting access to the park. Alternate residential access has been established for residents who live beside the park. Construction is expected to last one year.

Third Street – Morgan Avenue to Elizabeth Street

Corpus Christi Water Department (CCW) is improving utilities along Third Street. The construction contractor is implementing a temporary street closure of Third Street between Morgan Avenue and Elizabeth Street.

Detours will be in place to guide motorists around the work zone. Motorists will always have business access from Third Street during construction from Santa Fe Street. Motorists will always have access to the hospital's emergency entrance from Mogan Avenue. Construction is expected to last several weeks.

Water Street – at IH 37 Intersection

A contractor for AEP Texas is performing electrical upgrades and maintenance to the power supply at the intersection. To perform maintenance activities, the contractor will implement various sidewalks and lane closures along IH 37 and Water Street. Motorists will always have access to businesses during construction. Construction is estimated to last one month.

Yorktown Boulevard – Cimarron Boulevard to Bichon Drive

A contractor for the City is installing a new waterline in Bill Witt Park. To make their connection, the contractor will implement a lane and sidewalk closure along Yorktown Boulevard. Construction is expected to last several days.

Yorktown Boulevard – at Oso Creek Bridge

A contractor will perform survey operations on the Oso Creek Bridge and implement daily temporary lane closures as operations progress. Brief traffic delays will occur when traffic is reduced to one travel lane for both directions. Flaggers will be present during that time to assist motorists through the work zone. Motorists should be prepared to stop and expect brief delays when driving through the work zone. The surveying operation is expected to last several weeks.
