The rates in subsections (a), (b), (c) and (d) of this section are subject to gas cost adjustments as follows: Rates will be adjusted monthly by the city following the receipt of notice of the cost of gas from the supplier to pass on to the consumer the full amount of such cost adjusted for pressure base and gas loss and unaccounted-for factors. Additional fees and charges paid to the supplier, which are necessary for the city to receive the gas, shall be included in the cost of gas. Transmission costs including operating, debt service, fixed rate/volume gas resale losses, gas processing and storage will be included in the cost of gas. Unpaid gas costs resulting from price adjustments during extreme daily pricing, gas losses, billing errors, and other events will be distributed monthly during a recovery period and included in future monthly gas costs. During extreme daily market pricing events customers using city gas to generate electricity for the purposes of selling back to the grid or intermittent users with usage profiles outside of their average use may be charged based on their actual daily cost of gas.
