Weekly Construction Survival Tip

Keep on Message

With construction in full swing, now is the perfect time to remind your staff to keep on message. Sharing accurate and clear details regarding directions and the construction process will ensure that everyone is on the same page. Consider creating a short script that can be left by the phone and shared with employees. Make sure all your employees know what to say and how to say it and update the script as the project progresses. Also, don't forget to communicate the project details to your vendors to ensure good deliveries. Keeping on message is the best way to avoid confusion and stress among staff, customers, and suppliers.
