Construction Updates

City Staff Finalizes Business Signage

This week, City staff and the contractor met to discuss and finalize what business signage will be placed along Phase 1 of the Ayers Street Pedestrian & Turn Lane project from South Padre Island Drive to Gollihar Road. The contractor is expected to begin installing the traffic control plan in the area in the next two weeks.

Additionally, the contractor completed partial exploratory work locating existing underground utilities along the west side of Ayers Street from Nemece Street to McArdle Road.

All work is weather permitting.

Weekly Construction Survival Tip

Positive Pairings!

Are you considering a business remodel? Now may be the perfect time to pair your business construction with road construction. With the holiday's behind you and summer shopping still a way off, use this time to do things you haven't had time to address. Consider not only an indoor renovation but, an outdoor one as well. New curb signage or a new building sign will help your business pop once road construction is complete. Pairing business construction with road construction will ensure your customers are not inconvenienced more than once this year.

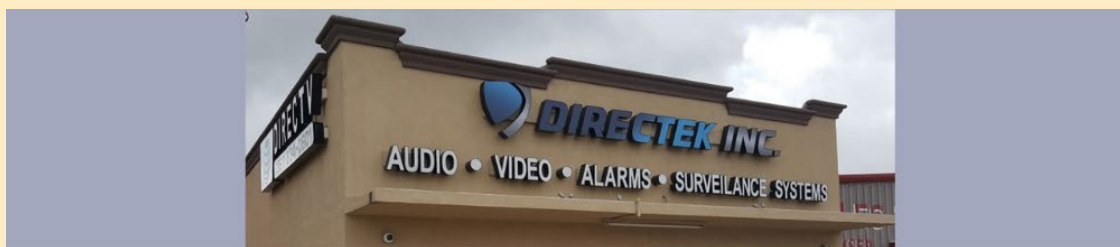

Featured Business

President of Company Envisions Safety for Pedestrians

Rene Villareal, President of Directek Incorporated, knows the importance of safety for his employees and customers. He believes the new sidewalks and improved lighting included in the Ayers Street Pedestrian & Turn Lane project will improve safety for all.

His only concern about the project is the potential for losing valuable parking space to new sidewalks in front of his store. His business has been located at 4536 Ayers Street for the last eight years. The location was a major reason he bought the property.

Directek Inc. offers a variety of services including the installation of security cameras, high speed internet, and television mounting.
